

PDI RF Course Content

You will:

- > Be given a brief introduction to Reflective Functioning.
- > Be given an introduction to the Parent Development Interview.
- > Be shown how the RF coding system works.
- > Go through the manual to highlight using examples all the categories of RF statements.
- > Learn how to assign the correct RF score to statements within the categories - ("Giving a single score")
- > Learn how to code a complete Parent Development Interview, showing in a practical way what to underline in the text of the interview and what to report on the coding sheet.
- > Learn how to assign the correct RF score to the whole interview ("Giving an overall score")
- > Be given homework which must be completed overnight and which will form the basis of discussion the next day.
- > Be given the material to complete the reliability test, and given direction on how to do so.
- > Receive a certificate of attendance at the end of the course.
